01 / WHO WE ARE

Designed with experience. Delivered with responsibility.

Established in Istanbul in 2019, Yolcubal brings its team's electrical contracting experience, built since 2008, to every project.

From our Istanbul base, we provide engineering solutions for industrial facilities, healthcare buildings, commercial spaces and residential developments.

We approach design, installation, testing, commissioning and operation as one connected process. Understanding each project, using resources efficiently and creating lasting value guide our work.

FROM REQUIREMENT TO SOLUTION

The right engineering for every building.

01

Building projects

- Industrial facilities
- Office projects
- Hospitals
- Shopping centres
- Mixed-use residential projects
- Hotels
- Public buildings
- Industrial storage facilities
- Smart buildings

02

Renewable energy

- Solar power plants
- Wind power plants
- Solid and liquid waste conversion plants

03

Energy

- Medium-voltage power supply
- Medium-voltage substations

02 / OUR EXPERTISE

Integrated engineering solutions.

01

Electromechanical contracting

From hospitals, hotels, shopping centres and offices to industrial facilities, we coordinate electrical, automation and instrumentation requirements across each project. Our site engineering covers pharmaceutical, chemical, petrochemical, paint and building-materials factories, liquid storage facilities and drinking-water pumping stations. For explosives manufacturing facilities and hazardous areas, electrical works are planned around the specific requirements of the site.

- Medium and low voltage systems
- Low-current systems
- Automation and instrumentation systems

02

Project design

We turn electrical and mechanical engineering needs into practical designs for commercial, industrial and residential spaces.

- Requirements analysis and feasibility
- Electrical and mechanical project design
- Preparation of specifications, bills of quantities and tender documents

02 / OUR EXPERTISE

Integrated engineering solutions.

03

On-site contracting

Our engineering and site teams work at your facility throughout the year, with a team structure tailored to your needs. We coordinate electrical, automation and instrumentation works with your operations team, planning renovation, capacity development and improvement projects around operating conditions.

- Dedicated resident engineering and site teams
- Electrical installation and site works
- Automation and instrumentation works
- Renovation and improvement projects
- Coordination and work planning with operations teams
- Delivery monitoring and technical reporting

04

Maintenance contracting

Our specialist teams plan routine maintenance, fault diagnosis and repairs. We support production continuity with a focus on operational and process safety. With a maintenance team tailored to your facility, we coordinate activities with your operations team and report inspections, interventions and improvement needs.

- Routine and planned maintenance
- Electrical, automation and instrumentation inspections
- Fault diagnosis and repair
- Checks supporting operational and process safety
- Maintenance planning and technical reporting
- Identification of improvement needs

02 / OUR EXPERTISE

Integrated engineering solutions.

05

Renewable energy

We develop electrical, automation and instrumentation solutions for solar, wind, hydroelectric and geothermal energy projects. Our engineering approach also covers energy storage systems, supporting sustainable energy investments from design through site implementation.

- Solar energy systems
- Wind energy projects
- Electrical and control systems for hydroelectric and geothermal facilities
- Energy storage infrastructure
- Investment feasibility and energy efficiency
- Design, site implementation and commissioning

06

Technical service

Our experienced technical teams address the service needs of electrical and electromechanical systems.

- Site surveys and assessment
- Fault analysis
- System improvements
- Equipment inspection
- Technical support

02 / OUR EXPERTISE

Integrated engineering solutions.

07

Engineering consulting

We provide engineering consulting and project management to support the technical and commercial objectives of investments.

- Project management
- Cost control
- Value engineering
- Technical supervision
- Reporting and coordination

QUALITY · ENVIRONMENT · SAFETY

Lasting value starts with the right process.

01

Quality

Compliance with specifications, programme discipline and continuous improvement.

02

Environment

Energy efficiency, responsible use of resources and waste reduction.

03

Safety

Risk assessment, workforce training and a culture of safe delivery.

03

Work in progress.
